

# LINE SHIELD

## LSP-101 Portable Unit

- The LSP-101 is a single port, portable version of the LINESHIELD. It is primarily intended for field technicians to access substation SCADA equipment connected to LINESHIELD Units from any location.
- A Central Administration System computer (CAS) is required for functionality. LSP-101 user must call into the CAS System daily (typical) for a security update in order to obtain the current access code and to remain functional. This automatically disables lost or stolen Units which would not call in or if they did, would not have the correct user password.
- The LSP-101 connects between the LINE port of a laptop or desk top computer and a phone line. It is controlled and powered via the USB connection.
- Only outgoing calls are possible from the LSP-101.
- Each LSP-101 is factory configured with a serial number, customer ID number and access code.

## **SPECIFICATIONS**

### **Power:**

Via USB connection

### **Phone Line & Device Ports:**

1 phone line jack, 1 device jack (connects to LINE jack of computer)

### **Environment**

Standard: 32 to 120 °F (0 to 50 °C), 0 - 95% non condensing rel. humidity

### **Certification**

Meets USA / Canada interconnect and power line cross standards

### **Physical**

Mounting: Desktop

Dimensions: 4.1"W x 1.3"H x 4.9"D (10.5cm x 3.3cm x 12.5cm)

Shipping weight: 1 lb (0.45 Kg.)
