7 February, 2018

Dear Valued Customer,

Subject: STATEMENT OF ROHS, REACH & USE OF CONFLICT MINERALS

Thank you for your request on these subjects. Following is a brief statement on each of these three items of concern:

## ROHS

Selcom relies on ROHS (European Union's restriction of the use of certain hazardous substances in electrical and electronic equipment) compliance information provided by its reputable distributors. All components used by Selcom are purchased exclusively from such reputable distributors and must be ROHS compliant. Further requests for certifications of RoHS compliance can be obtained from the individual original component manufacturers.

## REACH

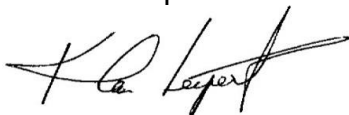

Selcom does not import more than one metric ton of any of the 181 SVHC (Substance of Very High Concern) into the European Union in any given year. As such, the notification requirements under Article 7(2) of REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) are not applicable to Selcom's electronic products.

## Use of Conflict Minerals

Selcom does not manufacture individual components used in the assembly of electronic products. As such, Selcom purchases finished components exclusively from reputable distributors. All of these distributors state that they are committed to support the efforts to end the human suffering and environmental impact associated with mining in the DRC (Democratic Republic of Congo) and adjoining countries.

We trust that these statements will be sufficient for your purposes. Please advise if you need more information.
